

Make-up

Gold-rimmed eyes and nude lips are perfect for most skin tones and take you from day to night. Apply thick black mascara and lots of gloss for a sassy evening look

Feminine

This sleeve is so feminine and flattering. Look for styles that come off the shoulder too. Hot pink is a colour to watch

Add colour
Inject some life into your wardrobe, it's all about colour this season

Rock on

Release the rock chick within! Be inspired by the latest catwalk looks

Go gladiator

Gladiator heels were just for the fashion forward in 2008 but now everyone is getting into them. Wear them with short skirts, high-waisted shorts, fitted jeans or leggings

Light & white

In this climate, lighter colours look cooler. Opt for material that is not so heavy. This look can take you to any social event

Headwear

The bohemian and tribal headband may be a trend that's popular with the younger fashion crowd but if this look suits you then go for it, it's very cool

Jumpsuits

These are starting to pop up all over the place and are available in fabrics you can dress up or keep casual

Watches

Accessories are just as big for men as they are for women. This is a great way to make a statement or to create your own look

Thongs

The good old thong is still a popular choice and is great for this climate. If you want a dressier look wear a leather style

"If over 200 people trust us with their hair every week THEN YOU CAN TOO"
